Summary

Motivated MCA student with hands-on experience in Java, Python, SQL, and front-end web development. Built real-world projects including a Finance Management System and a Machine Learning-based Stock Price Prediction System. Familiar with REST APIs, MySQL, Git, and Agile workflows. Seeking a Software Developer role to apply strong problem-solving skills and deliver scalable applications.

Education

Bishop Heber College **Jun. 2025 – May 2027**
Master of Computer Applications *Trichy, TamilNadu*

TECHNICAL SKILLS

Languages: Java, HTML/CSS, JavaScript, SQL,Python
Developer Tools: VS Code, Eclipse,Android Studio,Git,GitHub
Database: MySQL
Concepts: Machine Learning, Random Forest, REST APIs, OOP, SDLC, Agile

Experience

Big Learn-Software Development Intern **May 2026–June 2026**

* Designed and developed responsive UI components using HTML, CSS, and JavaScript, improving page usability across multiple screen sizes.
* Built and debugged Java-based mini-projects, applying OOP principles and coding best practices to ensure clean, maintainable code.
* Collaborated in an Agile-style team environment to deliver front-end features within sprint timelines.
* Executed real-time development tasks, reducing bug turnaround time through systematic debugging and code review practices

Projects

CrediFlow – Vendor Loan Dashboard(Finance Management System) | *Java,HTML,CSS,JavaScript* **June 2026**

* Developed a full-stack finance management application in Java with separate Admin and Vendor modules, managing 50+ vendor loan records.
* Implemented a loan management system enabling vendors to apply for loans and track repayment details in real time.
* Designed an Admin dashboard to review, approve, or reject loan requests and manage interest rates and loan records.
* Built EMI calculation and repayment tracking features to monitor outstanding balances and payment schedules.
* Improved code modularity and user experience through component-level design and efficient financial data management

Stock Price Prediction System | *Python, MySQL, GUI* **January 2025**

* Developed a stock price prediction system using Machine Learning, achieving accurate forecasts using the Random Forest Regressor algorithm.
* Trained model on historical stock data to identify patterns and predict future price trends with measurable accuracy.
* Integrated MySQL for data storage and built a GUI interface for user-friendly interaction with prediction outputs.

Certifications

- NPTEL – Database Management Systems
- LinkedIn Learning – APIs and Web Services
- Amazon Web Services - AWS Cloud Practitioner

Leadership / Extracurricular

* Active volunteer in the Student Association, coordinating technical events and peer learning sessions.
* Member of the Zoho Low-Code/No-Code Community and Google Developer Student Club (GDSC).
* Participated in inter-college hackathons, collaborating with teams to design and deliver software solutions within tight timelines
* Engaged in technical seminars, coding competitions, and workshops to continuously sharpen software development skills.
